

Congratulations to our Diane Lyons, R.D.H.

Dr. Schwartz would like to recognize and honor Diane Lyons, one of our expert hygienists, who has now been a highly valued member of his dental team for 17 years!

Diane's dedication and love for her profession is obvious to anyone who has the pleasure of meeting her. Diane has a very thorough knowledge of dentistry, nutrition and the oral-systemic health connection. She has even gone through the education process to becoming a certified nutritionist- all while working full time seeing patients for their dental hygiene care! She willingly and compassionately shares her knowledge to better the lives of those around her. Her main focus is the education of her patients on what they can do to achieve optimal health and wellbeing. There is no telling just how many lives Diane enriches on a daily basis, but we are certain the number is vast.

She has been Dr. Schwartz's personal hygienist and a beloved provider of optimal care for thousands of our patients. Even after 17 years of consistent and exceptional treatment she hasn't lost one bit of joy in her work. She is as warm and welcoming, compassionate and kind as she was on her very first day working with Dr. Schwartz. Her patients can truly feel her genuine care and concern for their health and wellbeing at every visit.

Patients love Diane for her gentle technique and thoroughness, she is a great listener and her calming demeanor will keep you relaxed and comfortable throughout your visit. All while you receive, the best cleaning ever, as her patients describe it. She has a way to make your dental experiences painless, enjoyable and informative. She is constantly learning, growing and changing to better serve her patients and is gracious enough to bring us all to a higher standard with her. She is a vital piece of the puzzle in our efforts for optimal patient care.

We are blessed to have such an incredible asset on our team. And on behalf of Dr. Schwartz and the entire dental team here at Family, Implant & Cosmetic Dentistry, we wish to congratulate Diane on this remarkable achievement.
