...The Magic is in Your Smile...

Vol CR, Issue 1

Get New Look A New Look in Just One Visit!!

Our new, on-site computerized milling system designs beautiful, durable, natural-looking fillings, crowns and veneers while you wait.

You don't have to live with chipped, stained or crooked front teeth! Thanks to our one-visit restorations, you may walk out of our office the very same day with the smile of your dreams!

Announcing... A New Technological Breakthrough!

That's right! By applying this breakthrough technology, our high-tech system can beautifully restore your teeth. We're pleased to announce this cutting edge care is now available to you. And you won't believe the incredible results!

Our **restorations are custom crafted in one visit** while you're in the chair, with a high-quality **dental ceramic**. It creates the same translucence, color and brilliance of your natural healthy teeth.

We will improve your smile with **porcelain-ceramic** veneers and crowns that are so natural-looking, no one will be able to tell the difference between your restored teeth and your natural teeth!

If you have any imperfections in your smile, we can transform your teeth to their original appearance and function. If you want to enhance your appearance, we can add perfection to your smile.

We pride ourselves in providing you the very latest advancements in dentistry. Our patented computer-generated restoration system is a unique process offered by only a handful of specially trained dentists.

The high quality and value of these metal-free restorations have been proven by nearly two decades of clinical experience worldwide. ❖

**"I used to be
afraid to smile.
NOW, I have a
smile that is
PRICELESS!"**

An Attractive, Younger SMILE Can Be Yours!

Sensational smiles aren't just for the rich and famous. Thanks to advances in restorative materials, *anyone* can have a youthful, stunning smile.

Stained teeth, old restorations, and decayed, worn or broken teeth can make you appear older than you are. In today's competitive environment, doesn't it just make good sense to look your best *every* day!

It doesn't matter whether you run a large *corporation* or a small *household*—kids, colleagues, and everyone in between—appreciate a fabulous, younger-looking smile.

When you feel good about yourself, you're more confident both professionally and socially.

Confidence breeds success in all that you do. Nothing boosts self-esteem like a healthy smile.

You can have close-up conversations with total confidence. You won't have to hide your smile any longer. If you really want to look younger, more vibrant, more attractive and exude confidence...or if you want to get noticed, treat yourself to the quality dentistry you deserve.

A New Smile can help to bring you a lifetime of health, comfort and beauty.

This is one of the exciting new ways that we can provide you with the smile that you have always wanted. And we can provide front teeth veneers or crowns in one appointment. Now *that's* something to smile about! ❖

We'll Save You Time, Money & Your Teeth

Save Time! You can walk in our office with a chipped, decayed, broken or stained tooth and leave with a brand new smile, often in less than two hours. No impressions or temporary fillings or repeat visits!

Save Money! Because these restorations are bonded to your own teeth, you enjoy lasting restorations that actually strengthen your teeth! Our restorations can prevent costly repairs for you in the future!

Save Your Teeth! We offer gentle, conservative tooth restoration so we can save more of your own natural tooth structure!

This patient was self-conscious and tried to hide the gaps between his front teeth.

After receiving his restorations—his smile and his confidence were restored!

What do you think when you glance at those great cover girl smiles? That it could never happen to you? Look again! Those perfectly-shaped teeth and bright-white smiles that radiate confidence can be yours.

WE CAN GIVE YOU A GREAT SMILE IN A SINGLE VISIT!

Until recently, cosmetic dentistry was limited to front teeth restorations. That's because tooth-colored filling material in the past wasn't always durable enough to withstand the tremendous biting forces required by back teeth.

You'll be pleased to know that **this extraordinary system allows us to create beautiful tooth-colored restorations** both for *front* and *back* teeth. In some cases, fillings, commonly called inlays or onlays, can take *less than an hour* to complete.

Our restorations are made from ceramic—a substance that is particularly compatible with the body. Two other materials of choice have been silver/mercury or gold restorations. Neither offered an aesthetically pleasing option.

The ceramic not only looks fabulous, it has the same characteristics as normal, healthy dental enamel. It is similarly hard wearing when undergoing the daily grinding of food.

Another big advantage is that our ceramics are so smooth, bacteria does not stand a chance. **This helps to maintain healthier gums.**

Now you can have quality dental ceramic fillings (inlays or onlays) that match the color and appearance of the rest of your teeth. Inlays and onlays are a very conservative restoration of a broken down tooth or may replace an existing large filling. ❖

TO FIND OUT IF THIS IS RIGHT FOR YOU, CALL US TODAY!

Before
Silver/Metallic Fillings

- May corrode (darken)
- Can require extensive removal of the teeth
- Often expand in time, fracturing the tooth
- Decay can develop under filling material (Can't see decay under dark filling)

After
New!
Restorations

- Attractive tooth color to match your teeth
- Preserve more of natural tooth structure
- Bonding actually strengthens the teeth
- Metal-free; no "metallic" taste
- No second visit! No temporaries!

5 Steps to a Perfect Smile

1 We take an optical impression of your tooth with the handheld camera.

2 A magnified image of your prepared tooth appears on the screen.

3 With the help of the computer, we custom design your restoration.

4 It mills the porcelain ceramic filling, inlay, onlay, crown, etc., from a ceramic block in just a few minutes! It's then permanently bonded to your teeth and you're done in one VISIT!!

5 Say "hello" to your **Perfect Smile!**
