A Brandon Area Treasure...

DR. SANDY SCHWARTZ

FAMILY, IMPLANT & COSMETIC DENTISTRY

The Brandon Area's own Dr. Sandy Schwartz is a uniquely credentialed leader in the field of cosmetic dentistry and he has been improving smiles and changing lives since 1979. His extensive qualifications and overall approach to the highest quality patient care make him a Brandon area treasure!

What I found most pleasing about my dental experience with Dr. Schwartz is his total patient professionalism. He is extremely educated in his field, possesses great artistic talent and has a warm and friendly bedside manner. He really relieves your anxiety. He is very comforting and reassuring as he walks you through the entire process. I would recommend him to anyone."
- Everett Nolte ~*

One of the challenges for people wanting to achieve a beautiful, healthy smile is finding a skilled cosmetic dentist. Did you know that right here in Brandon, we have one of the very finest, most uniquely qualified cosmetic dentists in the country? Dr. Sandy Schwartz of Family, Implant & Cosmetic Dentistry has been serving the Brandon area since 1986, perfecting the use of dental implants, dental veneers and all other facets of general and cosmetic dentistry.

Dr. Schwartz has the knowledge, advanced training, and experience to instill confidence, even in the most apprehensive patients. As a highly skilled sedation, implant and cosmetic dentist, Dr. Schwartz offers a full range of procedures including teeth whitening, dental implants and even Teeth-in-a-day™ at his family practice. From traditional dentistry, including oral hygiene and preventing, diagnosing and treating oral disease to cosmetic dentistry, which focuses on improving the appearance of a patient's teeth, mouth and smile, Dr. Schwartz can provide solutions for all your dental needs under one roof. He is not your average dentist. In addition to his extensive training and technical knowledge, Dr. Schwartz has a sharp eye for detail. He is an artist when it comes to the creation of outstanding, natural smiles.

Each day that the practice of Family, Implant & Cosmetic Dentistry opens for business, they open with a deep commitment to providing outstanding, quality care and service to all patients. Dr. Schwartz and his entire staff believe that their patients deserve the best dental care possible, including access to the latest and most effective treatments, personalized care, and attention to detail. Family, Implant & Cosmetic Dentistry is truly a family oriented practice. Not only do they treat every patient as a part of the family, Dr. Schwartz also works in the practice with

his wife, Lee, and son, Jake. Together with the rest of the dedicated staff, they have worked hard to develop the reputation of a practice where patients are put at ease and are welcomed with warmth, friendliness and professionalism, which in today's world is a hard thing to achieve in an office. Many members of Dr. Schwartz' staff have been happily employed with the practice for many, many years: Lee, since 1982; Diane, since 1997; Brenda, since 2004; Sally, since 2006; Nick, since 2007 to name just some of the staff that have all become like family.

When you speak with any of Dr. Schwartz' patients, one of the first things they mention is his kindness and compassion. He has a genuine honest caring for his patients and the community. Over the years, he has provided necessary dental treatments, at no charge, to patients that have fallen on hard economic times. He has also mentored countless young people that aspire to become dentists, from learning the very basics, such as how to clean the instruments, all the way through their dental school years. He has even written the recommendation letters to help with their acceptance into the school of their choice.

Dr. Schwartz earned a Bachelor's degree from State University of New York at Albany and his Doctor of Dental Surgery degree from New York University College of Dentistry in 1979. From there, he went on to complete a general practice residency at Albany Medical Center Hospital where he also served as assistant instructor in the Department of Surgery. While practicing in New York, Dr. Schwartz was an instructor at New York University College of Dentistry, and served on staff at Maimonides and Southside Hospitals.

Dr. Schwartz' continued education included a number of surgical and prosthetic programs on osseo integrated im-

plants, among them a 330 hour maxi course through the Medical College of Georgia and the American Academy of Implant Dentistry. He has also completed 600 hours in the University of Florida Comprehensive Dentistry Advanced Curriculum.

Throughout his career, and through hundreds of hours of training and education, extensive testing and case presentations, Dr. Schwartz has accomplished a number of challenging and prestigious designations including: Diplomate, American Board of Oral Implantology/Implant Dentistry; Fellow, International Congress of Oral Implantologists; Fellow, American Academy of Implant Dentistry; Master, Academy of General Dentistry and Associate Fellow, World Clinical Laser Institute. Additionally, Dr. Schwartz served on the Department of Surgery at Brandon Regional Hospital from 1986 - 2006. Dr. Schwartz is 1 of only one tenth of one percent of U.S. dentists to have been honored with Diplomate of the American Board of Oral Implantology/Implant Dentistry.

Even with this extensive list of accomplishments and credentials, Dr. Schwartz continues to pursue further mastery through continued education and dedication to the advancement of dentistry. This is evident in his participation and leadership in both local and national dental organizations. Memberships include: American Academy of Implant Dentistry, International Congress of Oral Implantologists, Florida Academy of Cosmetic Dentistry, American Academy of Cosmetic Dentistry, Academy of General Dentistry, American Dental Association, Florida Dental Association, West Coast District Dental Association, Hillsborough County Dental Association, and World Clinic-Laser Institute.

The Brandon area hit the jackpot back in 1986 when Dr. Schwartz decided to make this his home and establish his practice here! Dr. Schwartz discovered Brandon about three years after passing the Florida Dental Board examination. Brandon reminded him very much of his hometown, with much of the land being undeveloped, with large old-growth trees and cow

farms here and there. He opened his own practice here where he could apply the highest standards, ethics and philosophies. His philosophy is to provide the very best dental care available while treating all patients as family. Family, Implant & Cosmetic Dentistry's reception room was created to look and feel like your living room. The treatment rooms feature large windows, most with a peaceful view and comforting decorations. They offer everything from beverages, pillows and blankets to virtual reality glasses, just to ensure the comfort of patients. Their mission is to preserve, restore and replace teeth; to enhance smiles, improve dental health and overall health. And, by doing so, improve quality of life and length of life for their patients, their families and themselves.

"I have also made a career-long commitment to welcoming apprehensive patients, providing them with comfortable, safe, caring service, and converting them into lifelong, regular healthy patients." Said Dr. Schwartz. It is proven that those with excellen

dental health live longer, experiencing better quality of life than those with poor dental health. To maintain optimal dental health, it is essential that you regularly visit the dentist for cleanings, check-ups and maintenance. At Family, Implant & Cosmetic Dentistry, each patient is treated equally, with understanding and the same high quality care.

ARE YOU READY FOR LIFE-CHANGING IMPROVEMENTS TO YOUR SMILE?

During your first visit, the doctor will do a thorough and comprehensive examination, including oral cancer screening. In preparation for this exam he will gather all necessary medical records, review your past history and x-rays and, if necessary, take any additional x-rays needed; this may include a full set of digital, low radiation x-rays and a three dimensional CT scan. All information will be carefully evaluated so he can customize a treatment plan specifically to meet your individual needs. Team members will also provide computer previews, showing exactly how you would look with various smiles. You will also meet your hygienist who will personalize your hygiene appointment and home care to maintain healthy gums. A treatment plan, taking your immediate needs, as well as long term objectives into consideration, will be presented. The goal is to help you keep your teeth for a lifetime.

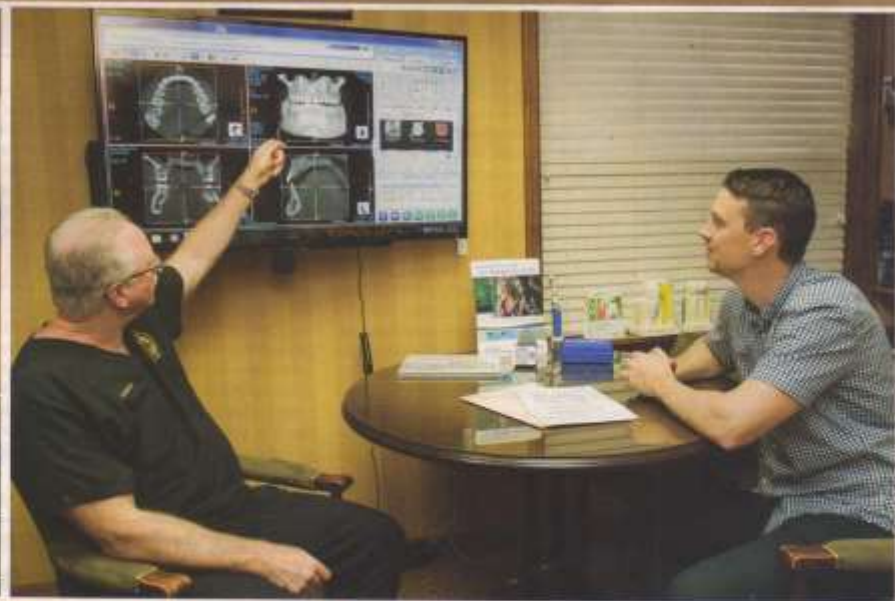

Family, Implant & Cosmetic Dentistry's outstanding team provides all services with state-of-the-art techniques and old-school comfort! General Dentistry, Dental Implants (that look like your natural teeth), Computer Guided Implant Surgery, Teeth-in-a-Day™ (Dr. Schwartz is one of a select few dentists in the country qualified to perform this procedure), Invisalign® (the invisible way to straighten

teeth), Zoom!®, Kor and Rembrandt Whitening, Lumineers, Veneers and Crowns are offered. In addition, Periodontal Therapy, Laser Assisted Periodontal Therapy, Laser Bacterial Reduction, Root Canal Therapy, Extractions, Dentures, Breath Care and more are services provided. Nitrous oxide, oral sedation or intravenous conscious sedation can ensure the safety and comfort of the most apprehensive patient.

Family, Implant & Cosmetic Dentistry can truly meet all your dental needs under one roof! Recently, they have added Cone Beam, CT Scan and 3-D Imaging to their list of unique services provided within their own office. This modern imaging technique is currently only found in the upper echelon of dental practices. Dr. Schwartz is now able to get a high-resolution 3-D image of a patient's mouth. It needs only half the amount of radiation of digital x-rays and takes only 17 seconds to complete. Dr. Schwartz can view a patient's jawbone from multiple angles to ensure proper and precise placement of dental implants.

Dr. Schwartz is a true treasure in our community. Having a dentist in our town with his very unique qualifications, commitment to excellence and sincere, caring approach to the health and well-being of his patients is one of the things that sets the Greater Brandon Area apart and makes this an exceptional place to live. To make an appointment, contact the office of Family, Implant & Cosmetic Dentistry at (813) 684-7888 or visit them at www.implantandcosmeticdentistry.com. They are conveniently located in Oak Park Plaza at 787 W. Lumsden Rd. in Brandon (corner of Kings Ave. and Lumsden Rd.)
